

# Technical Data Sheet

## **Ultrafuse PLA PRO1**

Date / Revised: 14.11.2019 Version No.: 3.2

#### **General information**

#### Components

Polylactic acid blend based filament for Fused Filament Fabrication.

#### **Product Description**

PLA PRO1 is an extremely versatile tough PLA filament made for professionals. It reduces your printing time by 30% – 80%, (subject to printer and object limitations) and the strength exceeds overall mechanical properties of printed ABS parts. Printer settings can be tuned to achieve blazing fast speeds or an unrivaled surface finish. The excellent quality control ensures the highest levels of consistency between colors and batches, it will perform as expected, every time.

#### **Delivery form and warehousing**

Ultrafuse PLA PRO1 filament should be stored at 15 - 25°C in its originally sealed package in a clean and dry environment. If the recommended storage conditions are observed the products will have a minimum shelf life of 12 months.

#### **Product safety**

Recommended: Process materials in a well ventilated room, or use professional extraction systems. For further and more detailed information please consult the corresponding material safety data sheets.

#### **Notice**

The data contained in this publication are based on our current knowledge and experience. In view of the many factors that may affect processing and application of our product, these data do not relieve processors from carrying out their own investigations and tests; neither do these data imply any guarantee of certain properties, nor the suitability of the product for a specific purpose. Any descriptions, drawings, photographs, data, proportions, weights etc. given herein may change without prior information and do not constitute the agreed contractual quality of the product. It is the responsibility of the recipient of our products to ensure that any proprietary rights and existing laws and legislation are observed.

| Recommended 3D-Print processing parameters |                                 |  |  |  |
|--------------------------------------------|---------------------------------|--|--|--|
| Nozzle Temperature                         | 200 – 220 °C / 392 – 428 °F     |  |  |  |
| Build Chamber Temperature                  | -                               |  |  |  |
| Bed Temperature                            | 50 – 70 °C / 122 – 158 °F       |  |  |  |
| Bed Material                               | Glass, tape at low temperatures |  |  |  |
| Nozzle Diameter                            | ≥ 0.4 mm                        |  |  |  |
| Print Speed                                | 40 - 150 mm/s                   |  |  |  |

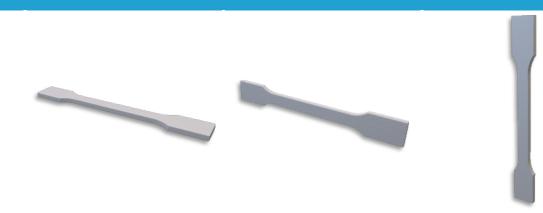

| Drying Recommendations                        |                                                           |
|-----------------------------------------------|-----------------------------------------------------------|
| Drying recommendations to ensure printability | 60 °C in a hot air dryer or vacuum oven for 4 to 16 hours |

Please note: To ensure constant material properties the material should always be kept dry.

| General Properties   |                                                  | Standard   |
|----------------------|--------------------------------------------------|------------|
| Printed Part Density | 1250 kg/m <sup>3</sup> / 78.0 lb/ft <sup>3</sup> | ISO 1183-1 |

| Thermal Properties           |                                                                              | Standard    |
|------------------------------|------------------------------------------------------------------------------|-------------|
| Glass Transition Temperature | 63.0 °C / 145 °F                                                             | ISO 11357-2 |
| Melting Temperature          | 170 – 180 °C / 338 – 356 °F                                                  | ISO 11357-3 |
| Melt Volume Rate             | 18.2 cm <sup>3</sup> /10 min / 1.1 in <sup>3</sup> /10 min (210 °C, 2.16 kg) | ISO 1133    |

### **Mechanical Properties**

| Print direction                    | Standard  | XY                     | XZ                     | ZX                 |
|------------------------------------|-----------|------------------------|------------------------|--------------------|
|                                    |           | Flat                   | On its edge            | Upright            |
| Tensile strength                   | ISO 527   | 48.0 MPa / 7.0 ksi     | -                      | 21.8 MPa / 3.2 ksi |
| Elongation at Break                | ISO 527   | 21.9 %                 | -                      | 0.9 %              |
| Young's Modulus                    | ISO 527   | 3166 MPa / 459 ksi     | -                      | 2930 MPa / 425 ksi |
| Flexural Strength                  | ISO 178   | 92.4 MPa / 13.4 ksi    | 99.1 MPa / 14.4 ksi    | -                  |
| Flexural Modulus                   | ISO 178   | 2823 MPa / 409 ksi     | 2340 MPa / 339 ksi     | -                  |
| Flexural Strain at Break           | ISO 178   | 4.3 %                  | 4.4 %                  | -                  |
| Impact Strength Charpy (unnotched) | ISO 179-2 | 20.4 kJ/m <sup>2</sup> | 18.8 kJ/m <sup>2</sup> | _                  |

12 rue Jean Bart 78960 Voisins le Bretonneux
